We launch a new training course on open access in archaeology

This December, we are launching a new training tool to delve into open access (OA) in archaeology.

Introducing the self-paced course **"Open Access in Archaeology"**, designed to adapt to your study schedule, with an estimated completion time of just two hours.

Perfect for researchers, professionals, and students who want to gain a deeper understanding of this model for disseminating scientific knowledge.

What does the course include?

The course is structured into six modules, each focusing on a key aspect of open access:

- **Module 1:** What is Open Access (OA)?
- **Module 2:** Publishing in OA
- **Module 3:** OA Journals
- **Module 4:** Books and Book Chapters in OA
- **Module 5:** OA Repositories

These modules provide **a comprehensive overview of applying open access in your projects and publications** while guiding you through the options available for sharing and preserving your research.

Available in Catalan and English!

The course is available in two languages, Catalan and English, and is hosted on **Canvas**, an open-source virtual learning platform offering an intuitive and accessible user experience. Each module includes informational materials, exercises, and self-assessment tools to help reinforce and apply what you learn.

A step forward in our commitment to open science

With this initiative, driven by the ICAC's Documentation, Library, and Open Science Center, we reaffirm our commitment to open science by promoting transparency and accessibility in scientific communication. We invite the academic and professional community to explore this resource and contribute to a future where knowledge is more accessible to all. We hope you find it valuable and encourage you to share it with colleagues and collaborators!

About the Catalan Institute of Classical Archaeology (ICAC-CERCA)

The Catalan Institute of Classical Archaeology (ICAC-CERCA) is a **CERCA center**, established in 2003 as a consortium by the Government of Catalonia and the Rovira i Virgili University. It is a Catalan institution with an international focus, leading research and conservation efforts in archaeological heritage.

Based in Tarragona, a city recognized as a UNESCO World Heritage Site in 2000, its

researchers are dedicated to understanding the past by studying archaeological remains and promoting the preservation of historical legacy. We are CERCA!
