ICAC-CERCA launches an open course to train in Archaeology Research Data Management

Why bother preparing research data management?

The Documentation Centre, Library, and Open Science Service of the ICAC-CERCA publishes **"Research Data Management Training in Archaeology"**, a self-study course in research data management for the research community; especially aimed at phd researchers.

The course is **available openly through the Canvas platform** (an open-source virtual learning platform) and is structured into four successive modules. Each module contains informative material, exercises, and self-assessment tests to reinforce and apply the knowledge acquired.

Although the course is aimed at PhD researchers, it can also be useful for the research community and master's students.

The course is available in **Catalan** and **English**. Also, you can download the materials directly from the RECERCAT repository.

About the Catalan Institute of Classical Archaeology (ICAC-CERCA)

The Catalan Institute of Classical Archaeology (ICAC-CERCA) is **a CERCA center** established as a consortium in 2003 by the Government of Catalonia and the Rovira i Virgili University. It is a Catalan institution with an international scope, at the forefront of research and conservation of archaeological heritage. Its headquarters are located in Tarragona, a city recognized as a UNESCO World Heritage Site in the year 2000. Its researchers work to understand the past through the study of archaeological remains and promote the preservation of the historical legacy. We are CERCA!
